

RULES TO LIVE BY

You should not make any unauthorized modifications to your machine.

Never alter the roll over protective structure (ROPS) unless approved by the manufacturer. Damaged ROPS must be replaced, not repaired or serviced.

Do not install any adapter device that results in the adapter, a portion of the rotating driveline, or the PTO to be unguarded.

Never tamper with safety devices. Check for proper operation regularly.

Do not change the engine governor settings or overspeed the engine.

Unauthorized machine modifications can increase the possibility of serious injury or death.
