LC

C-Series

EXCAVATORS

CONSTRUCTION EQUIPMENT

The 120C is rated at 89 SAE net hp
and the 160C LC at 109 net hp.

PERFORMANCE

Small excavators with big enough reach:
The 120C has a maximum digging depth
of 17 feet, 10 inches (8-foot, 3-inch arm),
while the 160C LC has a digging depth of
20 feet, 10 inches (10-foot, 2-inch arm).

EXPECT BIG

Whether you're adding an agile, niche machine that's just the right size or building your business by graduating from a backhoe to your first excavator, John Deere's 12-metric-ton 120C and 16-metric-ton 160C LC Excavators deserve a real close look. They're small machines with big machine feel and productivity.

These dynamos come with the same goodies as machines at the heavier end of the new C-Series line, like rugged and reliable John Deere PowerTech™ engines, heavy-duty cooling systems, reinforced booms, and operator stations that verge on self-indulgent.

Every day your customers expect big things from you in the way of productivity and versatility. The only way to deliver for them is to work with machines that will do the same for you. Call your John Deere dealer today for a demo.

Like all C-Series excavators, the 120C and 160C LC feature welded bulkheads inside the boom and arm to resist torsion stress. They also have thickened plates — three in the boom and one in the arm — to add strength and durability.

This way to profits. It's easy to take the 120C and 160C LC from job to job; all you need is a dump truck and a tag-along trailer.

THINGS

Deere's exclusive Powerwize™ II engine/hydraulic management system balances hydraulic pressure and flow, maximizing engine output, saving fuel, and enabling smooth multi-function operation.

Bring on the Heat.

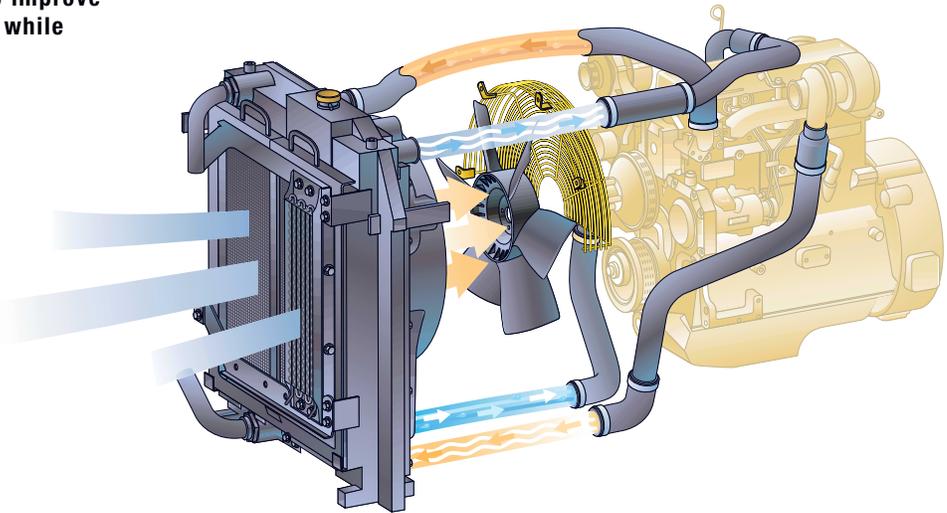

These excavators are very smart. A diagnostic display unit gives technicians the ability to read diagnostic codes and engine operating parameters such as fuel pressure, coolant temperature, and manifold temperature.

ENGINE & SYSTEMS

The John Deere PowerTech engine in the 120C and 160C LC is charge-air cooled to improve fuel economy and engine durability while reducing emissions.

The top and bottom tanks of the heavy-duty cooling system are heavy wall extrusions that are TIG welded to the core for maximum durability.

Wide fin spacing in the cooling system allows trash to pass through the cores, while a removable trash screen helps eliminate plugging.

Remember the old adage, “If you can’t take the heat, get out of the kitchen”? Well, these excavators will stay in the kitchen longer than a chef at a four-star restaurant. That’s due largely to the heavy-duty cooling system.

It features an aluminum bar-plate design with high-temp liquid-braze process for superior strength. There’s also the hybrid steel-and-plastic fan with an airfoil-blade design that results in more cooling performance while using less horsepower. Plus the fan runs much quieter, which may help you think about your next big project.

The John Deere 4.5-liter PowerTech turbocharged and charge-air-cooled engine provides steady power and meets the EPA and CARB emission non-road regulations. It’s just one more confidence-building feature that will help you cook up more business and higher profits.

The operator station floats on six silicon fluid-filled elastic mounts that take the shock out of the cab and make for very smooth operators.

Sit back and relax. With our new, adjustable lumbar support, you'll think you're cruising in a luxury car or SUV.

DEERE

There's plenty of glass in the operator station, giving you outstanding sight lines. Adjustable vents are everywhere. That makes it even easier for the "blend air" climate-control system to keep your working environment constantly comfortable.

**OPERATOR STATION**

Productivity Place.

Smoke-tinted sunroof hatch helps you keep an eye on overhead obstructions. Comes with a retractable shade to reduce glare.

We've thought of the little things, too: A 12-volt cellular phone jack, beverage cooler, and oversized cup holder are all standard equipment.

Operators need to be comfortable to do their best work. The C-Series cab really takes this philosophy to heart with a list of comfort features that goes from the retractable shade on the tinted sunroof right down to the self-cleaning floor mats.

The automatic, high-capacity “blend-air” climate control system keeps cab temperature right where you want it at all times. Plus, all the vents make it easy to “set it and forget it.” Next, take in what can only be described as “panoramic visibility.” That’s because C-Series Excavators have 28 percent more glass and a wiper blade that cleans 25 percent more of your viewing area before it tucks away out of sight. The sunroof also dramatically improves overhead visibility.

Now, sit a spell in the deluxe, cloth-covered seat and adjust it until it fits you like a glove. Feel the adjustable lumbar support massage your lower back and enjoy the wide armrests. Notice how all the controls are within easy reach? It’s time to kiss fatigue goodbye.

SERVICE

No Worries.

You've taken some risks to get where you are today: financing, bonding, acquiring that second piece of equipment, and bidding bigger jobs. With a John Deere extended warranty, we're going to give you one less thing to worry about — unbudgeted repair bills. Not only does Deere let you select the exact coverage you need, but also there's the peace of mind that comes from working under a manufacturer's warranty — not one that's backed by some insurance company. What's more, a John Deere warranty follows your machine wherever your work takes you. That makes warranty work hassle-free when done by a non-selling dealer.

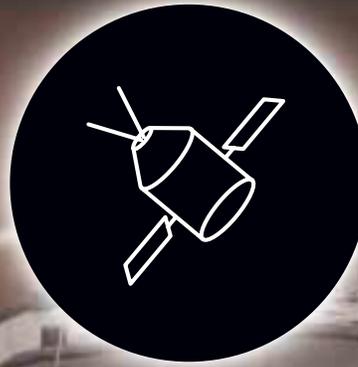

We know daily service prevents downtime, too. You'll find our lube points, filters, and dipsticks in convenient locations. Large, easy-to-open service doors ensure you won't struggle to reach the components you need to check. Bolted-on skid plates help you keep your footing while stepping or standing on the machine. We've also extended some key service intervals so you can spend more time in the cab making money than outside the cab marking time.

Take it personally: With John Deere's Customer Personal Service (CPS), you can customize programs and tools such as extended warranties, maintenance programs, parts availability programs, and more. It's customer service taken to a higher level.

Powdered-metal, oil-impregnated bushing in the front structure increases the greasing interval from 250 to 500 hours.

Service intervals have been extended. The first hydraulic oil change is at 4,000 hours and then every 2,000 hours thereafter.

Log-on to CPS-Online and you can e-mail your dealer, order parts, tech manual CDs, and training materials on a 24/7 basis.

Service doors with large handles help make service a snap.

We've arranged and grouped daily service points so that your daily walk-around is fast and easy.

120C Lift Capacities (continued)

Boldface italic type indicates hydraulic-limited capacities; lightface type indicates stability-limited capacities, in lb. (kg). Ratings at bucket lift hook, machine equipped with 0.79-cu. yd. (0.60 m³), 42-in. (1067 mm) wide, 925-lb. (420 kg) bucket; and situated on firm, uniform supporting surface. Total load includes weight of cables, hook, etc. Figures do not exceed 87 percent of hydraulic capacities or 75 percent of weight needed to tip machine. Ratings are based on SAE J1097.

Load Point Height	5 ft. (1.52 m)		10 ft. (3.05 m)		15 ft. (4.57 m)		20 ft. (6.10 m)		25 ft. (7.62 m)

160C LC Lift Capacities

Boldface italic type indicates hydraulic-limited capacities; lightface type indicates stability-limited capacities, in lb. (kg). Ratings at bucket lift hook, machine equipped with 0.78-cu. yd. (0.60 m³), 36-in. (900 mm) wide, 1,096-lb. (497 kg) bucket; and situated on firm, uniform supporting surface. Total load includes weight of cables, hook, etc. Figures do not exceed 87 percent of hydraulic capacities or 75 percent of weight needed to tip machine. Ratings are based on SAE J1097.

120C Buckets

A full line of buckets is offered to meet a wide variety of applications. The buckets have an adjustable bushing for side clearance, with the exception of the ditching bucket. Tooth selection includes either the John Deere Fanggs® or the ESCO (Helilok) Standard tooth. Replaceable cutting edges are available through John Deere parts. Optional side cutters add 6 inches (150 mm) to bucket widths.

160C LC

Recommended Bucket Size*	General-Purpose Bucket	Heavy-Duty Bucket	General-Purpose Bucket	Heavy-Duty Bucket
Material (loose weight)				
Wood chips – 700 lb./cu. yd. (420 kg/m ³).....	3.25 cu. yd. (2.5 m ³)	—	4.00 cu. yd. (3.1 m ³)	—
Peat, dry – 750 lb./cu. yd. (440 kg/m ³).....	2.75 cu. yd. (2.1 m ³)	—	3.50 cu. yd. (2.7 m ³)	—
Cinders – 950 lb./cu. yd. (560 kg/m ³).....	2.00 cu. yd. (1.5 m ³)	—	2.50 cu. yd. (1.9 m ³)	—
Peat, wet – 1,170 lb./cu. yd. (690 kg/m ³).....	1.75 cu. yd. (1.3 m ³)	—	2.25 cu. yd. (1.7 m ³)	—
Topsoil – 1,600 lb./cu. yd. (950 kg/m ³).....	1.38 cu. yd. (1.1 m ³)	—	1.75 cu. yd. (1.3 m ³)	—
Coal – 1,780 lb./cu. yd. (1050 kg/m ³).....	1.25 cu. yd. (1.0 m ³)	—	1.50 cu. yd. (1.1 m ³)	—
Caliche – 2,100 lb./cu. yd. (1250 kg/m ³).....	0.63–0.88 cu. yd. (0.5–0.7 m ³)	0.50–0.75 cu. yd. (0.4–0.6 m ³)	0.88–1.12 cu. yd. (0.7–0.9 m ³)	0.75–1.00 cu. yd. (0.6–0.8 m ³)
Earth, loam – 2,100 lb./cu. yd. (1250 kg/m ³).....	0.88 cu. yd. (0.7 m ³)	0.75 cu. yd. (0.6 m ³)	1.12 cu. yd. (0.9 m ³)	1.00 cu. yd. (0.8 m ³)
Shale – 2,250 lb./cu. yd. (1330 kg/m ³).....	0.88 cu. yd. (0.7 m ³)	0.75 cu. yd. (0.6 m ³)	1.12 cu. yd. (0.9 m ³)	1.00 cu. yd. (0.8 m ³)
Sand, dry – 2,400 lb./cu. yd. (1420 kg/m ³).....	0.88 cu. yd. (0.7 m ³)	0.75 cu. yd. (0.6 m ³)	1.12 cu. yd. (0.9 m ³)	1.00 cu. yd. (0.8 m ³)
Clay, dry – 2,500 lb./cu. yd. (1480 kg/m ³).....	0.63–0.88 cu. yd. (0.5–0.7 m ³)	0.75 cu. yd. (0.6 m ³)	0.75–1.00 cu. yd. (0.6–0.8 m ³)	0.88 cu. yd. (0.7 m ³)
Earth, dry – 2,550 lb./cu. yd. (1510 kg/m ³).....	0.63–0.75 cu. yd. (0.5–0.6 m ³)	0.63 cu. yd. (0.5 m ³)	0.88–1.00 cu. yd. (0.7–0.8 m ³)	0.88 cu. yd. (0.7 m ³)
Limestone, broken or crushed – 2,600 lb./cu. yd. (1540 kg/m ³).....	0.50–0.75 cu. yd. (0.4–0.6 m ³)	0.50–0.63 cu. yd. (0.4–0.5 m ³)	0.75–1.00 cu. yd. (0.6–0.8 m ³)	0.63–0.88 cu. yd. (0.5–0.7 m ³)
Earth, wet – 2,700 lb./cu. yd. (1600 kg/m ³).....	0.75 cu. yd. (0.6 m ³)	0.63 cu. yd. (0.5 m ³)	1.00 cu. yd. (0.8 m ³)	0.88 cu. yd. (0.7 m ³)
Clay, wet – 2,800 lb./cu. yd. (1660 kg/m ³).....	0.75 cu. yd. (0.6 m ³)	0.63 cu. yd. (0.5 m ³)	1.00 cu. yd. (0.8 m ³)	0.88 cu. yd. (0.7 m ³)
Rock, granite, blasted and broken – 2,800 lb./cu. yd. (1660 kg/m ³).....	0.63–0.88 cu. yd. (0.5–0.7 m ³)	0.50–0.75 cu. yd. (0.4–0.6 m ³)	0.88–1.12 cu. yd. (0.7–0.9 m ³)	0.75–1.00 cu. yd. (0.6–0.8 m ³)
Sand, moist – 2,850 lb./cu. yd. (1690 kg/m ³).....	0.75 cu. yd. (0.6 m ³)	0.63 cu. yd. (0.5 m ³)	1.00 cu. yd. (0.8 m ³)	0.88 cu. yd. (0.7 m ³)
Sand and gravel, dry – 2,900 lb./cu. yd. (1720 kg/m ³).....	0.75 cu. yd. (0.6 m ³)	0.63 cu. yd. (0.5 m ³)	1.00 cu. yd. (0.8 m ³)	0.88 cu. yd. (0.7 m ³)
Sand, wet – 3,100 lb./cu. yd. (1840 kg/m ³).....	0.63 cu. yd. (0.5 m ³)	0.50 cu. yd. (0.4 m ³)	0.88 cu. yd. (0.7 m ³)	0.75 cu. yd. (0.6 m ³)
Sand and gravel, wet – 3,400 lb./cu. yd. (2020 kg/m ³).....	0.63 cu. yd. (0.5 m ³)	0.50 cu. yd. (0.4 m ³)	0.88 cu. yd. (0.7 m ³)	0.75 cu. yd. (0.6 m ³)

*Contact your John Deere dealer for optimum bucket and attachment selections. These recommendations are for general conditions and average use. Larger buckets may be possible when using light buckets; and for flat and level operations, less compacted materials, and volume loading applications such as mass excavation in ideal conditions. Smaller buckets are recommended for adverse conditions such as off-level applications and uneven surfaces. Bucket capacity indicated is SAE heaped.

120C / 160C LC Excavators

Key: ● Standard equipment ▲ Optional or special equipment

*See your John Deere dealer for further information.

120C 160C LC Engine

- ● Meets EPA and CARB emission non-road regulations
- ● Auto-idle system
- ● Automatic belt tension device
- ● Batteries (two 12 volt), 180-min. (1,250 CCA) reserve capacity
- ● Charge air cooler
- ● Dual element dry-type air filter
- ● Enclosed fan guard (conforms to SAE J1308)
- ● Engine coolant to -34°F (-37°C)
- ● Fuel filter with water separator
- ● Full-flow oil filter
- ● Radiator trash screen
- ● Turbocharger
- ● Underhood muffler with vertical curved end exhaust stack
- ▲ ▲ Electric ether starting aid
- ▲ ▲ Engine coolant heater

Hydraulic System

- ● Auxiliary valve section
- ● Hydraulic pilot controls
- ● Reduced-drift valve for boom down, arm in
- ● Spring-applied, hydraulically released automatic swing brake
- ▲ ▲ Auxiliary hydraulic and electric pilot controls
- ▲ ▲ Hydraulic filter restriction indicator kit
- ▲ ▲ Load-lowering control device
- ▲ ▲ Single pedal propel control

Undercarriage

- ● Planetary final drive with axial piston motors
- ● Propel motor shields
- ● Track guides, front idler
- ● Triple semi-grouser shoes, 24 in. (600 mm)
- ▲ ▲ Triple semi-grouser shoes, 28 in. (700 mm)
- ▲ ▲ Rubber crawler pad, 24 in. (600 mm)
- ● Two-speed propel with automatic shift
- ● Upper carrier roller (1)
- ● Upper carrier rollers (2)
- ▲ ▲ Undercarriage with blade

Upperstructure

- Counterweight, 5,400 lb. (2450 kg)
- Counterweight, 7,275 lb. (3300 kg)

120C 160C LC Upperstructure (continued)

- ● Right- and left-hand mirrors
- ● Toolbox
- ● Vandal locks with ignition key: Cab door / Engine hood / Fuel cap / Service doors / Toolbox

Front Attachments

- ● Bucket-to-arm clearance adjustable bushing (except ditching buckets)
- ● Centralized lubrication system
- ● Dirt seals on all bucket pins
- ● No-boom-arm
- ▲ ▲ Arm, 8 ft. 3 in. (2.52 m)
- ▲ ▲ Arm, 8 ft. 6 in. (2.60 m)
- ▲ ▲ Arm, 9 ft. 11 in. (3.01 m)
- ▲ ▲ Arm, 10 ft. 2 in. (3.10 m)
- ▲ ▲ Attachment quick couplers
- ▲ ▲ Auxiliary hydraulic lines with shutoff valve
- ▲ ▲ Boom cylinder with plumbing to mainframe
- ▲ ▲ Buckets: Ditching / General purpose / General-purpose high capacity / Heavy duty / Heavy-duty high capacity / Severe-duty cast lip / Severe-duty plate lip / Side cutters and teeth
- ▲ ▲ Heavy-duty grapple
- ▲ ▲ Hydraulic bucket material clamps
- ▲ ▲ Hydraulic coupler

Operator's Station

- ● Adjustable seat with independent control positions (levers-to-seat, seat-to-pedals)
- ● AM/FM stereo
- ● Auto climate control/air conditioner, 20,000 Btu/hr. (5.9 kW), heater and pressurizer
- ● Cell-phone power outlet, 12 volt, 60 watt, 5 amp
- ● Coat hook
- ● Deluxe suspension cloth seat with 4-in. (100 mm) adjustable armrests and lumbar support
- ● Front windshield wiper with intermittent speed
- ● Gauges (illuminated): Engine coolant / Fuel

120C 160C LC Operator's Station (continued)

- ● Horn, electric on left control lever
- ● Hot/cool-box compartment
- ● Hourmeter, electric
- ● Hydraulic shutoff lever, all controls
- ● Interior light
- ● Large cup holder
- ● Machine Information Center (MIC)
- ● Mode selectors (illuminated): Power modes – three / Travel modes – two with automatic shift / Work modes – two
- ● Monitor system with alarm features: Auto-idle/auto-acceleration indicator light / Engine air cleaner restriction indicator light / Engine coolant temperature indicator light with audible alarm / Engine check light / Engine oil pressure indicator light with audible alarm / Low alternator charge indicator light / Low fuel indicator light / Wiper-mode indicator / Work-lights-on indicator / Work-mode indicator
- ● Motion alarm with cancel switch (conforms to SAE J994)
- ● Propel pedals and levers
- ● Seat belt, 2 in. (51 mm), retractable
- ▲ ▲ Seat belt, 3 in. (76 mm), non-retractable
- ● Tinted glass
- ● Transparent tinted overhead hatch
- ▲ ▲ Alternate pilot control pattern
- ▲ ▲ Circulation fan
- ▲ ▲ Protection screens for cab front, rear, and side
- ▲ ▲ Window vandal protection covers
- ▲ ▲ 24- to 12-volt D.C. radio converters, 10 amp

Electrical

- ● 45-amp alternator
- ● Blade-type multi-fused circuits
- ● By-pass start safety cover on starter
- ● Positive terminal battery covers
- ▲ ▲ Cab extension wiring harness

Lights

- ● Halogen work lights: One mounted on boom / One mounted on frame

Control Owning and Operating Costs

Customer Personal Service (CPS) is part of John Deere's proactive, fix-before-fail strategy on machine maintenance that will help control costs, increase profits, and reduce stress. Included in this comprehensive lineup of ongoing programs and services are:

Fluid analysis program – tells you what's going on inside *all* of your machine's major components so you'll know if there's a problem *before* you see a decline in performance. Fluid analysis is included in most extended coverage and preventive-maintenance agreements.

Component life-cycle data – gives you vital information on the projected life span of components and lets you make informed decisions on machine maintenance by telling you approximately how many hours of use you can expect from an engine, transmission, or hydraulic pump. This information can be used to preempt catastrophic downtime by servicing major components at about 80 percent of their life cycle.

Preventive Maintenance (PM) agreements – give you a fixed cost for maintaining a machine for a given period of time. They also help you avoid downtime by ensuring that critical

maintenance work gets done right and on schedule. On-site preventive maintenance service performed where and when you need it helps protect you from the expense of catastrophic failures and lets you avoid waste-disposal hassles.

Extended coverage – gives you a fixed cost for machine repairs for a given period of time so you can effectively manage costs. Whether you work in a severe-service setting or just want to spread the risk of doing business, this is a great way to custom-fit coverage for your operation. And an extended coverage contract also travels well because it's backed by John Deere and is honored by *all* Deere construction dealers.

Customer Support Advisors (CSAs) – Deere believes the CSA program lends a *personal* quality to Customer Personal Service (CPS). Certified CSAs have the knowledge and skills for helping make important decisions on machine maintenance and repair. Their mission is to help you implement a plan that's right for *your* business and take the burden of machine maintenance off your shoulders.

JOHN DEERE

Net engine power is with standard equipment including air cleaner, exhaust system, alternator, and cooling fan, at standard conditions per SAE J1349 and DIN 6270B, using No. 2-D fuel at 35 API gravity. No derating is required up to 10,000-ft. (3050 m) altitude. Gross power is without cooling fan.

Specifications and design subject to change without notice. Wherever applicable, specifications are in accordance with SAE standards. Except where otherwise noted, these specifications are based on units with full fuel tanks and 175-lb. (79 kg) operators; 42-in. (1067 mm) bucket, 28-in. (700 mm) track shoes, and 5,400-lb. (2450 kg) counterweight for the 120C; 36-in. (914 mm) bucket, 28-in. (700 mm) track shoes, and 7,275-lb. (3300 kg) counterweight for the 160C LC.
