IMPORTANT SAFETY NOTICE

Dear John Deere Customer:

In voluntary cooperation with the U.S. Consumer Product Safety Commission (CPSC) Warn Industries, Inc. is recalling certain Winch Kits containing 8 post contactors. A John Deere All-Terrain vehicle you own may be equipped with one of these Winch Kits. If you do not have a Winch Kit installed, you may discard this letter.

PROBLEM: The 8 post contactor may fail resulting in excessive heat within the contactor. Under rare circumstances, the contactor could potentially create a fire hazard.

PRODUCT: John Deere All-Terrain Vehicles

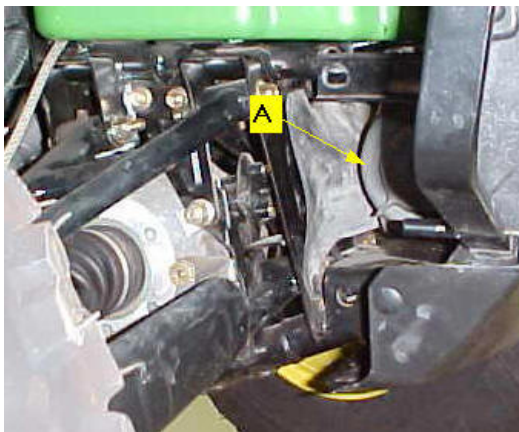

Model	Serial Number Ranges
Buck EX Utility ATV	M0FKTA5010000-020645*
Trail Buck 650 EX Utility ATV	M0GKVC5010000-020960*

*DOES NOT include M0FKTA5020646 units and above or M0GKVC5020961 units and above. These have been determined to have correct 4 post contactor installed.

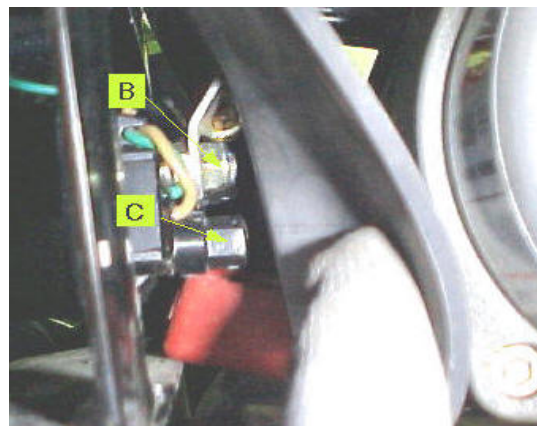

WHAT TO DO:

If you have a winch kit installed, inspect you machine.

1. Turn the front wheels all the way to the right (as you are seated on the ATV).

2. Looking under the vehicle from the front past the right wheel (as sitting on the seat), locate the rubber flap (A) covering the contactor.

3. Pull the rubber flap back from the frame. If you have a silver post (B) and a black post (C) visible, you have an 8 post contactor. If only the silver post is visible, you have a 4 post contactor.

- If you have a 4 post contactor no further action is required. Discard this letter.
- If you have an 8 post contactor, please call your nearest John Deere ATV dealership to set up an appointment to have the 8 post contactor replaced with a 4 post contactor.

If you no longer own the John Deere ATV please take a few moments to complete and mail the enclosed postage paid reply card.

We hope this recall will not cause you any undue inconvenience. Our efforts are intended to ensure your continued satisfaction with John Deere products and safe operation of your ATV.

If you have any questions, please contact the Customer Contact Center at **1-800-537-8233**.

Sincerely,

John Deere Worldwide Commercial and Consumer Equipment Division
